

Professional hearing protection

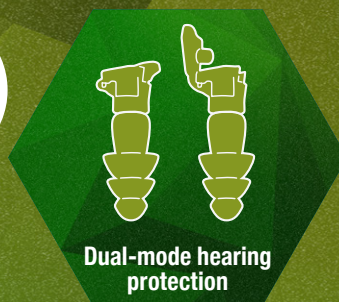

Impuls Plugs

NEW

Dual-mode hearing protection for impulse noise

Ideal for security personnel,
hunting, shooting sports and
various industries

SNR
28/15
dB

Impuls Plugs are reusable dual-mode hearing protectors designed for situations with fluctuating noise levels. When open, they reduce dangerous bursts of noise while ensuring that speech, warning signals and ambient sounds remain clearly audible. If greater noise reduction is required, the earplugs can simply be closed.

646101 Impuls Plugs

Soft TPE earplugs in a
handy PocketPack®.
Washable and reusable.

Key benefits at a glance

- Two modes in a single earplug
- Purely mechanical impulse noise protection – reliable without electronics or batteries
- SNR 28 dB (closed mode) for greater attenuation, tested to EN 352 and providing protection against noise peaks to ANSI standards
- SNR 15 dB in open mode. Due to the low attenuation, which improves communication and situational awareness, this mode does not constitute hearing protection in accordance with EN 352. At the same time, it offers protection against sudden noise peaks in accordance with ANSI
- Ideal for varying noise levels
- Quick switch between open and closed modes
- Compact, reusable and easy to use
- Includes a cord and practical PocketPak® storage box
- 2 sizes for a custom fit:
M/L and S. Size S is included and can be easily exchanged by the user

The stronger the pulse, the greater the reduction

ANSI S12.42-2010

132 dB -25 dB
150 dB -32,3 dB
168 dB -37 dB

EN352-2:2020+A1:2024

Cap closed

SNR 28 [dB] **H 27** [dB] **M 27** [dB] **L 27** [dB]

Cap open*

SNR 15 [dB] **H 19** [dB] **M 12** [dB] **L 7** [dB]

*Cap open: no hearing protector according to EU regulation 2016/425 PPE, minimum requirements of EN 352 not fulfilled
